

# Highfill Waterworks

Town Council Update – July 16, 2009

- Water Update
  - Silver Meadows and NWA Children's Shelter have both submitted for final approval through the Arkansas Health Department on the water and sewer designs.
  - Currently working with APAC, airport contractor, to get them water for a cement plant that will be operating on the airport property for the next year or so. They expect to use over a million gallons in that period.
  - We have responded to Centerton's request to acquire a part of our water system that runs along Hwy 102. As of the time of this report, they hadn't returned their response to us.
  - We have begun the initial stages of drafting the contract with the NW Regional Airport. Our agreement with them runs on a five year interval.
  
- Wastewater Update
  - Sewer line extension to NWA Children's Shelter and Silver Meadows sub-division has been completed. We did the final sign-off on Tuesday the 7<sup>th</sup>.
  - Had K-Jac's return to re-seed some of the lines that did not grow. Will be monitoring to assure we get it all covered before warranty runs out.
  
- Budget Item
  - Completed the Water and Wastewater year end budget. (*See Attached*)
