

# Highfill Waterworks

Town Council Update – June 8, 2010

- Silver Meadows has started again. Trying to finish phase 1.
- Still working on the Highfill to Centerton service area sale. Rural Development had a few questions. I have made contact with Bill Rowland with RD and he is still waiting for a response from his agency.
- Pumps at the sewer plant came in and we are in the process of replacing it. We are also repairing some bad glue joints at the same time.
- We still have the two ordinances expanding the number of board members to serve on the water and sewer boards. We have three prospective members and the water board will be choosing between them during their June 2<sup>nd</sup> meeting.
- We have got the water tower back up and running. The new transducer finally made it in. We manually operated the tower for three weeks.
- Rob and I have been to a couple of meetings this month. First was our re-cert for Plumbing Inspectors and the second was a Rural Development meeting where we gained information which will help us financially.
- I am working on the deferment of one of our loans this month. This is the one which is deferred until 2011. I am trying to get it deferred for 3-5 more years giving us time to gain more customers. I met with several individuals about this during the Rural Development meeting I went to.
- Our Consumer Confidence Report will be sent out this month. It is mandatory through the Arkansas Health Department that we send it out once a year. For those of you who receive a water bill, it will be mailed along with it.
- Finally, as promised, this month have submitted the 2011 Water/Wastewater Budget for your consideration (See Attached). As I may have mentioned, very little has changed. I have kept everything to a minimum. You will note 2010 and 2011 comparison along with YTD totals for 2010. We have 1 month left in 2010's budget.
